DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I in the reply filed on 5/4/07 is acknowledged. The argument is not found persuasive because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement. Furthermore, these inventions are distinct for the reasons given in the restriction requirement issued on 5/4/07 and have acquired a separate status in the art as shown by their different classification and/or have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

The requirement is still deemed proper and is therefore made FINAL.

2. Upon further consideration, claims 2 and 7 restriction requirement is hereby withdrawn. In view of the alternative embodiments disclosed, the following Species requirement is deemed necessary. The examiner regrets any delay in the prosecution of the application.

3. This application contains claims directed to the following patentably distinct species: Species 1: claim 23, a fusion without a binder material or a laser weld; Species 2: claim 2, a fusion includes a binder material; and Species 3: claim 7, a fusion includes a laser weld. The species are independent or distinct because the species require mutually exclusive materials, are not capable of use together and are not obvious variations of one another.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Conclusion

4. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional).

Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.
